

NITU KUMARI

Aspiring AI & Data Science Professional

+91 7857987758 | knituchoubey2004@gmail.com

[linkedin.com/in/nitu-kumari-a20756320](https://www.linkedin.com/in/nitu-kumari-a20756320)

PROFILE

B.Tech graduate in Artificial Intelligence & Data Science with a strong foundation in Python, C++, SQL, machine learning, and data analytics. Hands-on experience in real-time object tracking, computer vision, and automation through internships and academic projects. Skilled in applying technical problem-solving to develop data-driven solutions for real-world challenges

EDUCATION

Bachelor of Technology	2022 - 2026
Priyadarshini College of Engineering, Nagpur, Maharashtra CGPA: 6.56	
Higher Secondary Certificate (HSC)	2019 - 2021
Adarsh I/C Panditpur, Jagatpur, Varanasi, Uttar Pradesh 64%	
Secondary School Certificate (SSC)	2018 - 2019
Shri Bajrang Bali H/S Khajura Bhagwanpur, Kaimur, Bihar 69%	

SKILLS

Programming & Databases: Python | C++ (with DSA) | MySQL | HTML / CSS

Core Competencies: Analytical Skills | Problem Solving | Machine Learning Fundamentals

WORK EXPERIENCE

Cyber Security & Ethical Hacking Intern	Jan 2025 - Mar 2025
Conducted vulnerability assessments using Nmap and Wireshark to identify network weaknesses.	
Real-Time Multi-Object Tracking Intern, DRDO	Jun 2025 - Jul 2025
Developed a real-time multi-object tracking system using a Greedy Algorithm with Python and OpenCV, enabling efficient object association across video frames for faster and accurate tracking performance.	

PROJECTS

Advanced ATS Score Analysis and Resume Phrasing Enhancement	Sep 2024 - Mar 2025
Designed a dual-purpose system enhancing research accessibility and career readiness through automated resume analysis.	
Greedy Algorithm for Real-Time Multi-Object Tracking	Jun 2025 - Jul 2025
Implemented real-time object tracking, with noted trade-offs in accuracy for crowded scenes compared to optimal methods.	
Multi-Tasking Robot with Voice Command Execution	Aug 2025 – Sep 2025
Developed a robot capable of performing multiple tasks based on user voice commands.	
Smart Attendance Management using RFID, Arduino & Python	Jul 2025 – Nov 2025
Built an RFID-based attendance system using Arduino and Python to automate tracking and improve accuracy.
